KEY ONGOING ACTIVITIES

- Planning Technical Lead (Marty Durkin): No specific updates on the plan formulation front. There has been a lot of new planning guidance given to us with emphasis on benefits other than national economic benefits (Environmental Quality, Regional Economic Development, Other Social Effects). Looking forward to the plan formulation and getting into those other possible benefit accounts.
- Engineering Technical Lead (Patrick Snyder): Starting to work on unpacking some of the Future without-project results and looking into developing that initial array of alternatives. Other than that, just getting prepped for the in-person public meeting.
- Economics (Joel Belsterling): Team is undergoing a targeted Agency Technical Review on the future without-project model and awaiting comments. Results will be presented at the in-person meeting once the review has been completed. Looking forward to helping plan formulation develop benefits outside of national economic development and more into other benefit accounts. Also helping the cultural resources team assess the FWOP damages to existing sites and resources.
- Environmental (Darren Pecora): No specific updates. Working with plan formulation to determine Environmental Quality benefits, have reached out to XXX to use the marsh migration tool in coordination with geomatics. Looking forward to working with Elizabeth Godsey to incorporate ENW. Will be scheduling an environmental sub-team meeting in the coming month.
- Cultural Resources (Zuzana Chovanec): Working with economics to look at the historic structures in the city and look at potential impacts to those. Will soon be communicating with the cultural sub-team following the public meeting and as we get into formulating alternatives.
- Real Estate (Chris Bukolt): No updates at this time
- Office of Counsel (Katie Gwin): No updates at this time
- VRAP (Sabrina Collins): First version of the VRAP assessment has been completed. Looking forward to the public workshop to discuss with the public.
